

Висновок. Отже, для сучасної юридичної клінічної практики, характерним має бути акцент на розвитку ТОП-3 навичок для студентів-юристів. Це можуть бути додаткові курси, тренінги та ін. Виходячи з практики, безперечним досвідом для розвитку навички публічного виступу - є участь студентів-клініцистів у правоосвітній роботі Юридичної клініки університету, тобто у підготуванні виступів для школярів із правової тематики.

THE MEANING OF INSTRUMENT FOR ASSESSING THE QUALITY STANDARDS OF LEGAL CLINIC FOR SUSTAINABLE DEVELOPMENT OF CLINICAL MOVEMENT IN UKRAINE

Автор: Ломжець Ю. В., канд. політ. наук, доцент, завідувач кафедри морського та господарського права, Національний університет кораблебудування імені адмірала Макарова, виконавчий директор Асоціації юридичних клінік України, м. Миколаїв

Instrument for Assessing the Quality Standards of Legal Clinics in Ukraine developed in 2017 [1]. It is the first national manual for legal clinic assessment which based on a friendly stimulating approach. The assessment

is not some inspection. The main goal is to help legal clinic find ways to develop.

This instrument is a set of indicators of quality. Each indicator gets a particular estimation. The available indicator estimates 1 score, its absence – 0 scores. Each section has its key indicator which is to be estimated more than 1 score. When the experts sum up the estimations legal clinic gets a present of quality for each section and the final percentage rate.

Instrument consist of four areas of evaluation.

First is Legal clinic organization and support. This is a list of principles of organizational management: legal clinic must be ruled by salaried staff, get engaged sensible amount of students and competent professors, be visible, informative and cooperative in the University and the local community, had proper recourse support.

For examples, indicator 3.3 of first section of the Instrument says: the stuff and supervising teachers specialize in the legal clinic areas of activities (1 score for each staff member and/or supervising teacher (but not more than 3 scores in total) who has experienced career development in the field of legal clinics or human rights or legal awareness activities over the last 5 years). The career development shall be estimated in a broad sense (participation in conferences, roundtables, training sessions, etc. organized by the universities, state bodies, NGOs, involving the provision of respective certificates). This does not include upgrading qualifications in the field of general or sectoral legal subjects, as well as pedagogical subjects. The event should take more than one day (it equals to 2 or more short-lasting events).

When the experts prepare the report, it contains not only assessment but also detailed recommendations. And in indicator 3.3 of first section of the Instrument the experts give a list of different activities for career development of the stuff and supervising teachers of legal clinic.

Second section – inclusion of legal clinic education in the educational process: proper (modules and methods) legal clinic course/s in the academic curriculum, regarding legal clinic as a base for student's practice, appreciating the calculated activities of engaged professors.

When we talk about legal clinic educational course, it is no matter how it calls. What is really important that this course should conform with the modules and topics recommended within the Standards of Operations of Legal Clinics of Ukraine [2].

Third section includes principles of legal clinic legal aid: regularly made legal consultations on the basis of supervision, providing adequate quality control and honest statistical analysis.

Every year a competent person of legal clinic fills the Annual Performance Questionnaire. The number of consultations indicated in the Questionnaire shall correspond with the number of counseling sessions in the internal document of legal clinic. Instrument allows 5% deviation of the number of counseling sessions indicated in the Questionnaire.

Fourth section – Legal Awareness Activities in Legal Clinic. There are principles of legal clinic legal civil society education: regularly made different types of legal teaching and informing actions on the basis of staff support, use of modern approach, show honest statistics.

We believe that competent preparation and teaching students before awareness activities are really important. So there is an indicator 3 of fourth section of the Instrument which determines of organization of competence provision to the members of clinic legal (trainings, piloting classes etc.).

As has been said before legal clinic gets percent of quality for each section and final result. The given scores are differentiated by the areas, each of which totals to 100%. The average mean of the areas generates an overall score of 100% and collectively forms four levels:

- 0-30 % –an organization is on the way to a legal clinic;
- 31-60 % – basic level legal clinic;
- 61-80 % –legal clinic that meets quality standards;

81-100% – high level legal clinic.

Based on the results of the assessment, the working group prepares an expert opinion which would include a review of each criteria item and quality indicators, as well as recommendations for improving performance if appropriate.
